# spanners

MANUFACTURED BY JOHN BEDFORD AND SONS LIMITED

**chrome vanadium**  
**silver matt shank**  
**extra thin**  
**extra tough**  
**nickel plated jaws**

The scientific research of the war years, coupled with the very latest electrical heat treatment plant, has transformed the humble steel spanner into a slim, streamlined, extremely light and immensely strong tool, hardened and tempered throughout.

Bedfords' Spanners are produced entirely in our own works from High Grade Chrome Vanadium Alloy Steel, to the finished product. We forge the spanners, and carry out the delicate heat treatment under rigid temperature control, which ensures absolute uniformity in hardness and tensile strength. The narrow jaws permit the spanners to be used in confined spaces, whilst the plated finish and polished jaws gives a smart workmanlike appearance.

In accordance with our policy of expansion, we have now enlarged our Spanner range with the inclusion of Double Offset Bi-hexagon Ring Spanners, manufactured from the same high grade Chrome Vanadium Steel, and attractively finished with plated jaws.

Supplied in sets or Individual Sizes.

Different coloured labels are used for easy identification.

See following pages for exact sizes in production.

For "Quality Spanners" specify "Bedfords."

A Bedford Product.

**fully guaranteed**
